
Hello all!

Posted by NightRunner - 2008/03/22 20:43

Hello, I'm new to this site. Looking forward to learning some new information about making my home more green, as I'm a new homeowner. I live in Georgia, so I'm not looking forward to this summer's energy bill! This year I plan on being a lot more efficient with my AC usage. Any tips or tricks any homeowners know would be greatly appreciated.

Thanks!

Well some of the quickest tips might be the obvious too, but you can try turning a/c down while you are not home and off at night. Put some fans in the open night air and fans around the house. Help to bring in some of the night cool air.
